Notes

1. R_{8JA} is the sum of the junction-to-case and case-to-ambient thermal resistance where the case thermal reference is defined as the solder mounting surface of the drain pins. R_{8JC} is guaranteed by design while R_{8CA} is determined by the user's board design.

b) 114°C/W when mounted on a minimum pad of 2 oz copper

- 2. Pulse Test: Pulse Width < 300µs, Duty Cycle < 2.0%
- 3. The diode connected between the gate and source serves only as protection against ESD. No gate overvoltage rating is implied.
